

PROCEDURE TO FOLLOW IN CASE "WAITING FOR NEXT TAPE"

ATM Segment : ATM Recorder

ATM Fault: Archive Status indicating "Waiting for Next Tape" on Master REC node

Procedure to restore Archive status to normal state "Copy Status : Archive"

1. See procedure ADM 7.30 annexed- check Copy Status whether "archived".
2. If "Waiting for Next Tape" is displayed instead on "Copy Status".
3. Proceed to insert a black DVD in the DVD drive of the Master ATM REC node.
4. Select the DVD on the "Media Selection" button.
5. Click on "Initialize media: DVD" button.
6. Click on "next media: DVD and hold to select "archive".
7. At <Archive Time> the archiving process will start automatically. The "Copy Status" will be busy archiving.
8. At the end of the archiving the "Copy Status" will be "archived".
Thus, archiving on REC node is back to normal.

Also, see Procedure for Carrying Manual Archiving on ATM REC node as per annexed.
