

Revised 27/09/2021 from Sro Rheton.

VCS Procedure for Restarting TMCS Server in case of Shut Down

If TMCS Server shuts down

Switch on the Server
Select the following in the Login Window.

User Name: **Administrator**

Password: **pdts11!**

Starting TMCS Client Application :

Double click on the TMCS icon on the desktop

Select User Name (**tech**)+ Password **tech**) and click **OK**.

Click on the configurator window  of the launchpad.

From the available configuration list, select the appropriate configuration which is activated.

Click the **OPEN** button.

The new window displays the element tree and all alarms.
